The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Nova Scotia, 1952. Not exactly the place you'd expect to run into pirates. But an old mariner, his boat driven ashore in a gale, brings with him enough stories about buccaneers and their lore to make it seem that he must have had firsthand experience of the pirate life. But how is that possible? Captain Charles Johnson's uncanny knowledge of seamanship's dark side fuels the imagination of the young boy he befriends, setting the boy on his own journey of mysterious adventure.

From Pulitzer Prize finalist Annie Jacobsen, the untold USA Today bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood

notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, *Surprise, Kill, Vanish* brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

When he stands before Giorgione's *La Tempesta*, Booker Prize-winning author John Berger sees not only the painting but our whole notion of time, sweeping us away from a lost Eden. A photograph of a gravely joyful crowd gathered on a Prague street in November 1989 provokes reflection on the meaning of democracy and the reunion of a people with long-banished hopes and dreams. With the luminous essays in *Keeping a Rendezvous*, we are given to see the world as Berger sees it -- to explore themes suggested by the work of Jackson Pollock or J. M. W. Turner, to contemplate the wonder of Paris. Rendezvous are manifold: between critic and art, artist and subject, subject and the unknown. But most significant are the rendezvous between author and reader, as we discover our perceptions informed by Berger's eloquence and courageous moral imagination.

Rising gas prices, sprawl and congestion, global warming, even obesity--driving is a factor in many of the most contentious issues of our time. So how did we get here? How did automobile use become so vital to the identity of Americans? *Republic of Drivers* looks back at the period between 1895 and 1961--from the founding of the first automobile factory in America to the creation of the Interstate Highway System--to find out how driving evolved into a crucial symbol of freedom and agency. Cotten Seiler combs through a vast number of historical, social scientific, philosophical, and literary sources to illustrate the importance of driving to modern American conceptions of the self and the social and political order. He finds that as the figure of the driver blurred into the figure of the citizen, automobility became a powerful resource for women, African Americans, and others seeking entry into the public sphere. And yet, he argues, the individualistic but anonymous act of driving has also monopolized our thinking about freedom and democracy, discouraging the crafting of a more sustainable way of life. As our fantasies of the open road turn into fears of a looming energy crisis, Seiler shows us just how we ended up a republic of drivers--and where we might be headed.

Offering a study in the history of ideas, of design and architecture, and of cultural politics, this book converges on the issues of globalisation. It explores the development of international laws of intellectual property, ideas of design pedagogy, and competing philosophies of aesthetics.

MISLED Special Task Force agent Derek Atkinson has a craving for luscious vampire Sable Taylor. But Sable's a bounty hunter, which makes him direct competition in the capture of wanted criminals. Despite the obvious attraction between them, she won't give him a chance and after two years, he's tired of waiting for her to come around. So he's got a plan to give them both what they want... each other. Sable's on a dangerous mission. She's not who Derek thinks she is, so anything personal just isn't possible. But like most master vampires, Derek's wily and used to having his way. When he traps her on his ship, she decides to indulge. Two straight days of mind-blowing sex should be enough, but it isn't, not for either of them. Her heart is involved now, but Sable can't let Derek get too close. If he finds out what she's doing, he'll never forgive her. Derek, however, refuses to let go. Now he's getting shot at and asking questions she shouldn't answer. Sable has to reveal the truth... Derek's love has been misled... **KISS OF THE NIGHT** Special Task Force agent Alexei Night has had a crush on Interstellar Council Representative Briana Michaels ever since the first time he saw her on the vid comm. But their lives are worlds apart. He's a vampire. She's not. There's no possibility of a relationship between them. Yet he still dreams of her... When Briana's unpopular position supporting vampiric rights threatens her family, Alex leaps at the chance to protect her and be with her. It's a two-week journey to her homeworld, and he'll spend it making love with the woman he can't keep, trying to get enough of her to last an eternity. Their erotic connection is easily established but their bond doesn't overshadow the danger surrounding Briana. A hopeless romance with a woman whose mortal life is threatened... Things can't get any worse for Alex. And then somehow...they do.
