BNFC by Indextra AB - AppAdvice

The edition pictured is the 2016-2017 edition. The British National Formulary for Children (BNFC) is the standard UK paediatric reference for prescribing and pharmacology, among others indications, side effects and costs of the prescription of all medication drugs available on the National Health Service .

The BNF for Children (BNFC) provides essential practical information to all healthcare professionals involved in the prescribing, dispensing, monitoring and administration of medicines to children.

This is the standard reference for prescribing and dispensing drugs. In addition to the core information there are notes on the different drug groups to help in the choice of appropriate treatment. The BNF is updated in March and September of each year and compiled with the advice of clinical experts under the authority of a Joint Formulary Committee.

This book is a leading source of paediatric drug information. Compiled with the advice of clinical experts, this book provides essential information for all healthcare professionals involved in the prescribing, dispensing, monitoring & administration of medicines to children. It encourages the safe, effective and appropriate use of medicines in the management of childhood conditions. Updated in print every twelve months, the BNFC reflects current best practice, as well as legal and professional guidelines relating to the use of medicines. The BNF is also available online as part of Medicines Complete, on PDA and on also CD-ROM for intranets. 70 per cent of healthcare professionals have become more aware of suitable medicines & treatments as a result of using BNFC. Whereas the 'standard' BNF deals with the use of medicines for individuals of all ages, BNFC is able to focus specifically on the use of medicines in children. This is important because children respond to ill health and drug treatment in a different way to adults. BNFC deals with the drug management of childhood conditions more extensively. Infantile spasms, acute asthma, pulmonary hypertension, congenital metabolic disorders, and paediatric emergencies are just a few examples of this. BNFC covers the drug treatment of rare childhood diseases such as type 2 diabetes whose incidence is increasing. BNFC provides more information on unlicensed use of medicines ranging from fluoxetine for childhood depression to levamisole for nephrotic syndrome. BNFC includes more guidance on specialist paediatric interventions, ranging from caffeine for neonatal apnoea to intravenous ibuprofen for closure of ductus arteriosus. BNFC includes details of those medicines that are used in children in a different way to adults. While nitrazepam can be used for infantile spasms in children, it is used as a hypnotic in adults. Administering medicines to children is a challenge in itself and so BNFC provides more practical advice on this. BNFC provides more space for clearer and more comprehensive presentation of paediatric doses including neonatal doses and makes special reference to the cautions, contra-indications, side-effects, and drug interactions of medicines used in children. BNFC includes algorithms for acute paediatric life support and nomograms for calculating body surface area. BNFC includes details of unlicensed medicines that can be imported, manufactured by 'special-order', or prepared extemporaneously. BNFC provides information on the drug management of conditions that are relevant to children. Parkinson's disease and dementia, for example, are dealt with by the BNF.

The BNF for Children (BNFC) 2017-2018 provides essential practical information to all healthcare professionals involved in the prescribing, dispensing, monitoring and administration of medicines to children. It has been revised and revalidated to reflect changes in product availability, emerging safety concerns and shifts in clinical practice. The resource addresses a significant knowledge gap in many areas of paediatric practice by providing practical information on the use of medicines in children of all ages from birth to adolescence.

The BNF for Children (BNFC) 2018-2019 provides essential practical information to all healthcare professionals involved in the prescribing, dispensing, monitoring and administration of medicines to children. It addresses a significant knowledge gap in many areas of paediatric practice by providing practical information on the use of medicines in children of all ages from birth to adolescence. Recommendations in the BNFC have been constructed on the basis of authoritative sources, emerging evidence and best practice guidelines. The content has been carefully validated by a network of paediatric experts and the process is overseen by a paediatric formulary committee. The BNF for Children 2018-2019 has been revised and revalidated to reflect changes in product availability, emerging safety concerns and shifts in clinical practice.

A concise and practical guide to caring for children with life-limiting conditions, Paediatric Palliative Care covers the common symptoms and challenging issues healthcare professionals are likely to encounter, and includes a detailed drug formulary for quick reference.

Guidance handbook is a drugs information approach of community pharmacy designed to provide practitioners and trainees or students with accurate information that can be used easily in community pharmacy. Guidance handbook is prepared to give quick and comprehensible learning about drugstore for pharmacists who present in community pharmacy for training. Also can be useful in refreshing pharmacist's information, who were absent from practicing community pharmacy. Guidance handbook could help professional pharmacists, who willing to grant arranged and comprehensible training for B. Pharm Students or trainees.

Part of the highly regarded Nelson family of pediatric references, Nelson Essentials of Pediatrics, 8th Edition, is a concise, focused resource for medical students, pediatric residents, PAs, and nurse practitioners. Ideal for pediatric residencies, clerkships, and exams, this 8th Edition offers a readable, full-color format; high-yield, targeted chapters; and new features that make it even more user-friendly for today's in-training professionals or practitioners. Focuses on the core knowledge you need to know, while also providing complete coverage of recent advances in pediatrics. Coverage includes normal childhood growth and development, as well as the diagnosis, management, and prevention of common pediatric diseases and disorders. Includes new Pearls for Practitioners bullets at the end of each section, providing key clinical points and treatment information. Features well written, high-yield coverage throughout, following COMSEP curriculum guidelines relevant to your pediatric clerkship or rotation. Uses a full-color format with images and numerous new tables throughout, so you can easily visualize complex information. Provides real-world insights from chapter authors who are also Clerkship Directors, helping you gain the knowledge and skills necessary to succeed both in caring for patients and in preparing for clerkship or in-service examinations

Essential reference for Community Practitioner Nurse Prescribers. Provides an overview of common conditions and details of medicines that may be prescribed.
