the number of protons in  
the nucleus of an atom  
of that element.

Hydrogen has 1 proton,  
and oganesson has 118.

The seven rows of the table, called periods, generally have metals on the left and nonmetals on the right.

The columns, called groups, contain elements with similar chemical behaviours.

Six groups have accepted names as well as assigned numbers: for example, group 17 elements are the
