House of Debt is important because it persuasively demonstrates that the conventional meta-narrative of the crisis and its aftermath, which emphasizes the breakdown of financial intermediation, is inadequate.... All future work on financial crises will have to reckon with the household balance sheet effects they stress.

Armed with clear and powerful evidence, Atif Mian and Amir Sufi reveal in House of Debt how the Great Recession and Great Depression, as well as the current economic malaise in Europe, were caused by a large run-up in household debt followed by a significantly large drop in household spending. Though the banking crisis captured the public's attention, Mian and Sufi argue strongly with actual data that current policy is too heavily biased toward protecting banks and creditors.

They argue that the run up in household debt was one of the major causes of the Recession due to how the debt was financed. They offer an in depth exploration of the mortgage backed securities market and collateral debt This is a dense, but insightful work on the causes of the Great Recession in the US.

Next, they explain how debt not only doomed the poor, it actually triggered the whole housing bubble to begin with. Their work here is, for lack of a better word, forensic. They go state-by-state, nay, ZIP code by ZIP code splitting America by (i) high/low leverage (ii) high/low constraints in expanding city limits (iii) high/low credit score and demonstrate that credit expansion led price house appreciation.
