House of Suns is a strong Alastair Reynolds novel - not as pulpy sci-fi as his previous novel The Prefect, it's harder on the technical and scientific side of things, but just as strong in characterisation and plotting, taking into consideration vast concepts of the nature of space, longevity and artificial intelligence.

House of Suns: Truly epic time scales, but characters also shine Originally posted at Fantasy Literature This is the first Alastair Reynolds book I've read not set in his REVELATION SPACE series, and many of his fans claim it's his best book. I'd have to say it is pretty impressive, dealing with deep time scales rarely seen for any but the most epic hard SF books.

HOUSE OF SUNS (2008) Clarke shortlist. Six million years in the future, starfaring clones, tensions between human and robot metacivilisations, King Crimson jokes. This was a very enjoyable novel to write, especially after the claustrophobic THE PREFECT and I think it shows.

An "engaging and awe-inspiring" (SF Signal) space opera from the critically-acclaimed author of the Revelation Space series. Six million years ago, at the dawn of the star-faring era, Abigail Gention fractured herself into a thousand male and female clones, which she called shatterlings. She sent them out into the galaxy to observe and document the rise and fall of countless human empires. Since then, every two hundred thousand years, they gather to exchange news and memories of their travels. Only there is no Gathering. Someone is eliminating the Gention line. And now Campion and Purslane -- two shatterlings who have fallen in love and shared forbidden experiences -- must determine exactly who, or what, their enemy is, before they are wiped out of existence . . .

For many of us, the Ace Double Novels of the '50s and '60s have long been a source both of pleasure and nostalgia. This new double volume from Subterranean Press stands squarely in that distinguished tradition, offering a pair of colorful, fast-paced stories from the reigning master of the intergalactic space opera: Alastair Reynolds. Thousandth Night, the genesis for the epic novel House of Suns, is quintessential Reynolds. A visionary account of intrigue, ambition, and technological marvels set within a beautifully realized far-future milieu, it combines world-class storytelling with a provocative meditation on the mystery, grandeur, and inconceivable immensity of the universe. The masterful novella Minla's Flowers features Merlin, a familiar figure to Reynolds's readers. Diverted by technical difficulties to a planet known as Lecythus, Merlin finds himself forced to play a part in the moral and military dilemmas of a world on the verge of extinction.

Part science fiction thriller, part interstellar adventure, and part noir crime, *Century Rain* is an astonishing international bestseller of "blistering powers and style" (SF Revu). Three hundred years from now, Earth has been rendered uninhabitable due to the technological catastrophe known as the Nanocaust. Archaeologist Verity Auger specializes in the exploration of its surviving landscape. Now, her expertise is required for a far greater purpose. Something astonishing has been discovered at the far end of a wormhole: a mid-20th-century version of Earth, preserved like a fly in amber. Somewhere on this alternate planet is a device capable of destroying both worlds at either end of the wormhole. And Verity must find the device, and the man who plans to activate it, before it's too late -- for the past and the future of two worlds. *Century Rain* is a jaw-droppingly good SF thriller, packed with pace, adventure, brilliant storytelling and with twists that will keep you guessing to the end.

Alastair Reynolds revolutionized the science fiction genre with his critically-acclaimed *Revelation Space* novels. Now, the award-winning author presents a future of technological wonders—from every era. In a far-distant future, Spearpoint, the last human city, is a vast, atmosphere-piercing spire. Clinging to its skin are the zones: semiautonomous city-states, each of which enjoys a different—and rigidly enforced—level of technology. Following a botched infiltration mission, enforcement agent Quillon has been living incognito, working as a pathologist in a morgue. But when a near-dead angel drops onto his dissection table, his world is wrenched apart. For the angel is a winged posthuman from Spearpoint's Celestial Levels. And with the dying body comes bad news: Quillon must leave his home and travel into the cold and hostile lands beyond Spearpoint's base. But he can

The first novel in the Poseidon's Children series from the acclaimed author of the Revelation Space series. One hundred and fifty years from now, Africa has become the world's dominant technological and economic power. Crime, war, disease and poverty have been practically eliminated. The Moon and Mars are settled, and colonies stretch all the way out to the edge of the solar system. And Ocular, the largest scientific instrument in history, is about to make an epochal discovery... Geoffrey Akinya wants only one thing: to be left in peace, so that he can continue his long-running studies into the elephants of the Amboseli basin. But Geoffrey's family, which controls the vast Akinya business empire, has other plans for him. After the death of his grandmother Eunice—the erstwhile space explorer and entrepreneur—something awkward has come to light on the Moon, so Geoffrey is dispatched there to ensure the family name remains untarnished. But the secrets Eunice died with are about to be revealed—secrets that could change everything...or tear this near utopia apart.

Pushing Ice is the brilliant tale of extraordinary aliens, glittering technologies, and sweeping space opera from award-winning science fiction author Alastair Reynolds. 2057. Humanity has raised exploiting the solar system to an art form. Bella Lind and the crew of her nuclear-powered ship, the Rockhopper, push ice. They mine comets. And they're good at it. The Rockhopper is nearing the end of its current mission cycle, and everyone is desperate for some much-needed R & R, when startling news arrives from Saturn: Janus, one of Saturn's ice moons, has inexplicably left its natural orbit and is now heading out of the solar system at

high speed. As layers of camouflage fall away, it becomes clear that Janus was never a moon in the first place. It's some kind of machine -- and it is now headed toward a fuzzily glimpsed artifact 260 light-years away. The Rockhopper is the only ship anywhere near Janus, and Bella Lind is ordered to shadow it for the few vital days before it falls forever out of reach. In accepting this mission, she sets her ship and her crew on a collision course with destiny -- for Janus has more surprises in store, and not all of them are welcome.

Alastair Reynolds pushes the boundaries of science fiction and "confirms his place among the leaders of the hard-science space-opera renaissance" (Publishers Weekly) in this novel in his Revelation Space universe. Late in the twenty-sixth century, the human race has advanced enough to accidentally trigger the Inhibitors--alien killing machines designed to detect intelligent life and destroy it. The only hope for humanity lies in the recovery of a secret cache of doomsday weapons--and a renegade named Clavain who is determined to find them. But other factions want the weapons for their own purposes--and the weapons themselves have another agenda altogether...

Elysium Fire is a smoldering tale of murderers, secret cultists, tampered memories, and unthinkable power, of bottomless corruption and overpowering idealism from the king of modern space opera. Ten thousand city-state habitats orbit the planet Yellowstone, forming a near-perfect democratic human paradise. But even utopia needs a police force. For the citizens of the Glitter Band that organization is Panoply, and the prefects are its operatives. Prefect Tom Dreyfus has a new emergency on his hands. Across the habitats and their hundred million citizens, people are dying suddenly and randomly, victims of a bizarre and unprecedented malfunction

of their neural implants. And these "melters" leave no clues behind as to the cause of their deaths... As panic rises in the populace, a charismatic figure is sowing insurrection, convincing a small but growing number of habitats to break away from the Glitter Band and form their own independent colonies. A collection of eight short stories and novellas in the dark and turbulent world of Alastair Reynolds' Revelation Space universe. Centuries from now, solidarity stretches thin as humanity spreads past the solar system and to the nearest stars. Technology has produced powerful new tools-but lethal risk will always accompany great advancement. And without foresight, opposing groups may fracture multiple worlds. Between the Demarchists and the Conjoiners, the basic right to expand human intelligence-beyond its natural limits-has become a war-worthy cause. Only vast lighthugger starships bind these squabbling colonies together, manned by the panicky and paranoid Ultras. And the hyperpigs just try to keep their heads down. The rich get richer. And everyone tries not to think about the worrying number of extinct alien civilizations turning up on the outer reaches of settled space...because who's to say that humanity won't be next?

A fabulous collection spanning the galaxies and career of SF superstar Alastair Reynolds Reynolds' pursuit of truth is not limited to wide-angle star smashing - not that stars don't get pulverised when one character is gifted (or cursed) with an awful weapon by the legendary Merlin. Reynolds' protagonists find themselves in situations of betrayal, whether by a loved one's accidental death, as in 'Signal to Noise', or by a trusted wartime authority, in 'Spirey and the Queen'. His fertile imagination can resurrect Elton John on Mars in

'Understanding Space and Time' or make prophets of the human condition out of pool-cleaning robots in the title story. But overall, the stories in ZIMA BLUE represent a more optimistic take on humanity's future, a view that says there may be wars, there may be catastrophes and cosmic errors, but something human will still survive.
