The Strategic Education Research Partnership (SERP) is a bold, ambitious plan that proposes a revolutionary program of education research and development. Its purpose is to construct a powerful knowledge base, derived from both research and practice, that will support the efforts of teachers, school administrators, colleges of education, and policy officials with the ultimate goal of significantly improving student learning. The proposals in this book have the potential to substantially improve the knowledge base that supports teaching and learning by pursuing answers to questions at the core of teaching practices. It calls for the linking of research and development, including instructional programs, assessment tools, teacher education programs, and materials. Best of all, the book provides a solid framework for a program of research and development that will be genuinely useful to classroom teachers.

The original Visible Learning research concluded that one of the most important influencers of student achievement is how teachers think about learning and their own role. In *Ten Mindframes for Visible Learning*, John Hattie and Klaus Zierer define the ten behaviors or mindframes that teachers need to adopt in order to maximize student success. These include: thinking of and evaluating your impact on students ' learning; the importance of assessment and feedback for teachers; working collaboratively and the sense of community; the notion that learning needs to be challenging; engaging in dialogue and the correct balance between talking and listening; conveying the success criteria to learners; building positive relationships. These powerful mindframes, which should underpin every action in schools,

essential reading in addressing the needs of today's diverse student population. Combining insights from multicultural education theory and research with real-life classroom stories, Gay demonstrates that all students will perform better on multiple measures of achievement when teaching is filtered through their own cultural experiences. This bestselling text has been extensively revised to include expanded coverage of student ethnic groups: African and Latino Americans as well as Asian and Native Americans as well as new material on culturally diverse communication, addressing common myths about language diversity and the effects of "English Plus" instruction.

Co-authored by an international team of experts across disciplines, this important book is one of the first to demonstrate the enormous benefit creative methods offer for education research. It illustrates how using creative methods, such as poetic inquiry, theatre and animation, can support learning and illuminate participation and engagement.

Strong Foundations: Evidence informing practice in early childhood education and care celebrates the progress made by the Australian early childhood education and care profession since the implementation of the Early Years Learning Framework. Recognising this progress, Associate Professor Anna Kilderry and Honorary Professor Bridie Raban lead a team of 34 notable contributors from 13 universities and institutions throughout Australia, who focus on the challenges of access, equity and quality that remain across the sector. With a Foreword by Professor Alison Elliott, Strong Foundations brings together knowledge and insights from research in education, health, social care, child safety, science, mathematics and the arts. The critical importance of health, wellbeing and safety in the first five years of children ' s lives is reflected in a particular focus on supporting positive lifestyle choices, on social and emotional development and on the role that adults play in keeping children safe. The book addresses policy requirements from the Early Years Learning Framework, the National Quality Standard and Quality Improvement Plans,
