Fair Information Practice Principles. A robust privacy program works at a high level of organization from fair information principles. Industry and government standards, as well as established practices define these principles. A cursory reading of these practices recognizes the enormity of the task, beginning with an inventory of information collected and maintained by the university and followed through with the need for assessment, policy and best practice tools.

Make Data and Information Available (with appropriate restrictions): Sharing data and information is the key purpose of information management, so any IM program should keep this as a core principle. However, not everyone should have access to everything, so clearly lay out who should have access, and ensure the technology you use supports these policies.

All in all, "Principles and Practice of  
Information Security" is a very good place to  
start if you want to get a handle on IT  
security. And I think it will also function well  
as a way to review how balanced and  
thorough your existing security plans are.
