Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

This is an accident-avoiding prescription for electricians, safety managers, and inspectors, and engineers dealing with electricity any voltage level. Presenting crucial protective safety strategies for industrial and commercial systems, the Handbook references all major safety codes (OSHA, NEC, NESC, and NFPA) where appropriate, creating a unique, one-stop compliance manual for any company's electrical safety training and reference needs.

transformational book in the lives of many US women as well as international clients. Though written for professional women, men have enjoyed reading and share being powerfully impacted by the 6 Power Zone Principles(TM) included. Also, this has become a powerful tool for René Johnson's clients with several businesses investing in the entire team to read and leave their comfort zones! In this book, the author René Johnson shares her passion for helping professional women lead their lives from their Power Zones. The Power Zone is where transformation happens, courage is found, inspiration is fired up, passion and confidence combine and taking risks to grow and fulfilling your dreams looks achievable. René strongly feels that when women explore the boundaries of their comfort zone, they can become an empowered leader in all areas of their life, creating a ripple effect to all they influence. As a result, their lives, businesses, and communities they serve are all enriched. Empowered leaders at all levels are much needed in our society and the world today. With her message, René wants to positively challenge women (and men inspired by the message) to step up and find their "inner" leaders and breakthrough to their Power Zones. This book continues to change lives for the better as it's not like other books that will inspire you yet leaving you thinking - now what! Instead, it's created as a guide with René gently and passionately coaching the reader through the 6 Power Zone Principles(TM), while sharing her personal story and client examples, with detailed step-by-step instructions to turn inspiration into powerful action.

Providing guidance on a broad range of issues for young children and adolescents, *Ergonomics for Children: Designing Products and Places for Toddlers to Teens* give you a deep understanding of how children develop and how these developmental changes can influence the design of products and places for children. subsections are organized to help you locate and understand the content you need. Edited by experts with contributions from an international panel, the book is both broad in coverage and international in perspective. The contributors review the ways in which children develop physically, perceptually, cognitively, and socially and then use this information to provide practical guidelines for the design of places and products for children.

This book provides an overview of the environmental problems that arise from construction activity, focusing on refurbishment as an alternative to the current crisis in the construction sector, as well as on measures designed to minimize the effects on the environment. Furthermore, it offers professionals insights into alternative eco-efficient solutions using new materials to minimize environmental impacts and offers solutions that they can incorporate into their own designs and buildings. It also demonstrates best practices in the cooperation between various universities in Andalusia in Spain and Latin America and many public and private companies and organizations. This book serves as a valuable reference resource for professionals and researchers and provides an overview on the status of investigations to find solutions to improve sustainable development in terms of materials, systems, facilities, neighborhoods, buildings, and awareness of the society involved.

Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. Work by artists from Pierre Bonnard to Barbara Kruger and writers from Guillaume Apollinaire to Susan Sontag. An important reference for collectors and connoisseurs. Includes notable works by Marc Chagall, Henri Matisse, and Pablo Picasso.
