Get children excited about science with this essential, encyclopedic introduction to physics, chemistry, and biology. What makes a firework bang? How do plants use sunlight to make food? What is the mysterious force that makes a magnet cling to your refrigerator? With astonishing images, simple graphics, and crystal-clear text Science a children's encyclopedia will explain the answers to all these questions, and many, many more. Find out how chemistry begins with matter - the stuff we and our world are all made of - and the building blocks of atoms, so super-small there are about one million, million atoms on the dot of this "i". The science of physics explains forces, energy, light, electricity, and magnetism. Forces are the hidden power behind everything on Earth, and the Universe beyond. It's the force of gravity that keeps you stuck on Earth's surface, so it's pretty important to understand. Biology is all about how living things work, from tiny germs, to giant trees, to you! Did you know your amazing body has more than 1,000 parts, including bones, muscles and other organs? Packed with the essential information that every curious child needs to understand how our extraordinary world works, Science a children's encyclopedia should be in every family library.

Presents information about the sciences, from biotech and the Big Bang to energy and electrons.

The ultimate book of knowledge for kids aged 7 to 9, this thorough children's encyclopedia contains all the homework answers your kids will need, explained clearly and checked by experts. An engaging, traditional-style general reference book for kids covering all the key subjects including Arts, People, History, Earth, Nature, Science, Technology, Space, and the Human Body in alphabetical order. This encyclopedia for children is a must-have resource for every student's shelf, with age-appropriate, jargon-free text accompanied by stunning, detailed images covering over 240 topics all in one place, from science and nature to history and the arts. Essential for any child who wants to discover as much as possible about the world around them. Packed with information, each single-page entry in this fabulous kid's encyclopedia features a key topic explained in a concise manner accompanied by gorgeous visuals, fun facts about the world and extensive cross-references revealing the links between subject areas. Kids can learn about Ancient Rome, chemistry, evolution, microscopic life, robots, Vikings, and so much more. Written, edited, and designed by a team of experts, vetted by educational consultants, and properly levelled to the reading age, this is the ultimate knowledge book for kids. Explore, Wonder And Learn! The ultimate illustrated children's encyclopedia is packed with thousands of incredible and essential facts on favourite subjects! Beautiful illustrations, colourful maps, and magnificent photographs bring every single page to life. Inspiring and informative, the DK Children's Encyclopedia is a book of wonder that will absorb and engage children of all ages. This kid's educational book covers topics like: - Storytelling, changing the world, music and war - Films, technology, inventions, food and clothes - Explorers, planets and pets - And so much more!

This stimulating and comprehensive encyclopedia for children ages 8-12 provides answers to all the questions kids love to ask. Each chapter is jam-packed with maps, charts, timelines, diagrams, beautiful images, and amazing facts. Did you know, for example, that a single drop of blood contains around five million blood cells? Or that there are areas of desert in all seven of Earth's continents? Kids can build their knowledge on a wide range of topics-including Earth and beyond, plants and animals, history and politics, science, technology, and the human body-arranged thematically with more than 9,000 indexed entries and 2,500 colorful images. Cross-reference icons encourage children to explore and discover linked information, feeding their curiosity and building their general knowledge. The New Children's Encyclopedia, which has sold almost 500,000 copies worldwide since 2009, has now been fully updated in line with the latest knowledge and research. Developed, written, and checked by experts, this is the must-have reference book for every child's library.

Now in paperback, The Oxford Children's Encyclopedia of Science and Technology is a major reference book for children of 8 and over, giving a fascinating insight into the secrets of modern science. Some 135 major entries carefully explain the issues. Each article features colour photos and other illustrations specially selected to expand on the information given in the text. The articles are arranged alphabetically from Acids to X-rays, to allow quick access to information, and the text is completely up to date and has been checked by experts.

In the book, Life Sciences and Human Body, the author has explained in detail all the different forms of life which exist on the Earth in a very simple and comprehensive manner with colourful and attractive pictures. This has been aimed to attract the readers, particularly the school children and help them understand and grasp the chapters quickly enhancing their knowledge about the various living organisms - both of the animal and plant kingdom that inhabit our Mother Earth. The book is broadly divided into two parts: Part-I dealing with the Classification, Anatomy, Habitat, Behaviour, Food Habits, etc of Plants and Animals, followed by some interesting and fascinating Quick Facts about all these living organisms-making it all the more worth reading. The second part (Part - II) includes all about the Human Body, its Morphology,

Anatomy and Functions of each part or organ with clear and colourful labelled diagrams for the students, particularly the school going ones. The chapters are followed by Exercises and a Glossary of difficult words and scientific terms compiled at the end of the book. Though our aim is to be flawless, but errors might have crept in inadvertently. So we request our esteemed readers to read the book thoroughly and offer valuable suggestions wherever necessary to improve and enhance the quality of the book. Hope it interests you all and serves its purpose well.

The present book, General Science includes a number of fascinating and interesting chapters like The Atmosphere, The Change of Seasons, Why do Plants and Trees become Extinct, The Vision of Owls, The Colour of Fireworks, Formation of a Rainbow, What is Milk Made up of, etc. The highlights of the book are: Colourful and labelled illustrations Interesting Quick Facts A glossary of difficult words, containing their meanings, explanations, etc. So dear readers, pick up the book as fast as you can, for it's a treasure trove of knowledge and information, which you can use as a reference material for competition preparation or extra curricular activities. Happy Reading and Learning!

This encyclopedia will open your eyes to the extraordinary world around us. With over 40 practical experiments to try, it brings science to life. The experiments are easy to do, requiring no special equipment, but they explain key scientific principles. Eye-catching photographs throughout the book show how these principles work on a larger scale - and introduce some fascinating facts. This book is perfect for children aged 8+. ABOUT THE SERIES: The Children's Encyclopedia series by Arcturus Publishing uses stunning photography, fabulous facts and useful diagrams to introduce a variety of subjects - from the animal kingdom to space. Great to dip into, these reference guides are a staple for any child's bookshelf.

The present book, Scientists Inventions and Discoveries is one among the five books of the series, Children's Encyclopedia - The World of Knowledge. The book has been broadly divided into two parts- Part-I: The brief life histories and salient contributions of some well-known Scientists like Archimedes, Albert Einstein, Charles Darwin, Galileo, Newton, Louis Pasteur, Michael Faraday, Marie Curie, Thomas Alva Edison and many more. The second part or Part II emphasises on some major Inventions and Breakthroughs in the scientific world, such as: Bacteria, Vitamins, Vaccines, Aeroplane, Electricity, Cinema, Steam Engine and so on which have revolutionised and transformed the human life completely. Therefore dear readers, grab the book as soon as you can, for it's a treasure trove of knowledge and information, and if you happen to be a school student, you can even use it as a reference book or guide. Happy Reading and Learning too!
